It is with great pleasure that we recommend "Back To Nature" for landscape architecture.

We used "Back to Nature" for the landscape design on a substantial and challenging renovation of our existing home. The house is a Tudor style with heavily landscaped mature plantings, which we not only wanted to preserve, but needed to balance with our new extension.

Anthony Sblendorio and his highly skilled staff carefully designed and implemented a detailed plan of our property to fit into our existing setting and make it look as though it had always been there.

The company's attention to detail, respect for the environment and knowledge of plantings helped to make our home truly an "English Garden". "Back to Nature" is by far New Jersey's leader and innovator in the field of landscape architecture. We are very pleased to have chosen them for our project.

Sincerely,

*Gina & Kurt Conti*
